➤ 6 Point Socket

Chamfered corners eliminate stress concentration in the corners, increasing durability of sockets. Special radius-corner-design 6 point faces ensure the sockets grip securely, preventing any further damage of the fasteners.

➤ **12 Point Socket**

12 Point design makes it easier to locate the socket onto fastener. **GESTAR®** special designed sockets apply drive on the sides instead of corners, allowing high torque to be applied without damaging the corner of the fasteners.

▶ E-TORX® (Star) Socket

For open Torx® head fasteners. Greater facial contact improves torque transmission. Chamfered corners release stress and increase durability.
